

Project Backlog:

→ User Registration

- ◆ Users must create an account to be able to make trips
- ◆ This will save their previous planned trips so they can access it when they log in again

→ User Profile

- ◆ Will have the option to “follow” other vacation plans that they may not have created so they can edit the same plan with their friends
- ◆ Will display a list of trips that they are a part of
 - Allows for multiple trip plans per user

→ Recommendations

- ◆ Form for users to input ways they would want to customize their trip
 - Type of activities they prefer (hiking / city / morning / etc)
 - Budget
- ◆ Will take the user inputs to offer personalized activity recommendations
- ◆ Could generate an itinerary or offer a list of activities for users to choose from
- ◆ Find flights and hotels

→ Trip Planning

- ◆ Will have an itinerary creation section and a list of activities section
- ◆ Users can add, modify, or remove activities
- ◆ Will display the planned itinerary on a map to be easier to visualize
 - Can provide estimated travel times between activities

→ Allows for collaboration between different users

- ◆ Must “follow” the trip to be able to edit the plan/itinerary
- ◆ Real-time updates so the latest changes are always visible
- ◆ After a change is made, an email can be sent to other people who follow the trip plan
- ◆ Can have a small corner for “messages” or comments that can be made if users can’t talk to each other
